Corner Of  
Airport Rd. & Hwy 89

# New Wood Flooring

2

As a custom manufacturer of wood flooring we don't just produce the ordinary. When it comes to specifications, we go way beyond. Our wide plank flooring comes in random widths up to 8 inches and lengths up to 12 feet. Custom would be ordering individual widths and often only cost pennys more. Here are some desirable local woods below, but we can use any exotic wood, and also, most new & antique floors in either solid or 3/4" engineered.

**Hickory** in a select grade

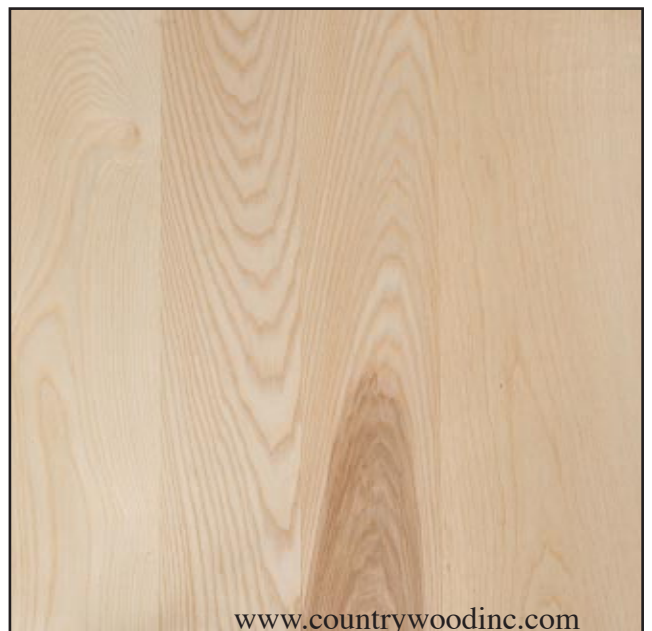

**Walnut** in a #1 common grade

**Salvaged Ambrosia Maple**

**Ash** in a select grade

# New Wood Flooring

3

**Hard Maple** in a select grade

**White Oak** - quarter sawn in a select grade

**Cherry** in a #1 common grade

**Brown Maple** in a select grade

## **Grading:**

*#1 common* will allow a greater range of colours in the boards and mineral streaks and small knots

*Select* tries to even out the colour range and removes most of the streaks and small knots

The ambrosia maple allows a greater colour range, small knots, spalted ( black streaks ), holes and streaks that were caused by the ambrosia beetle

# Custom Flush Mount Vents

4

wood shown - antique elm

Our **custom made flush mount air vents** come oversized to give maximum air flow

Standard sizes are for 3 \* 10" and 4 \* 10" vents

As shown above custom sizes are available, and in almost any woods including antique

# Reclaimed Wood Flooring

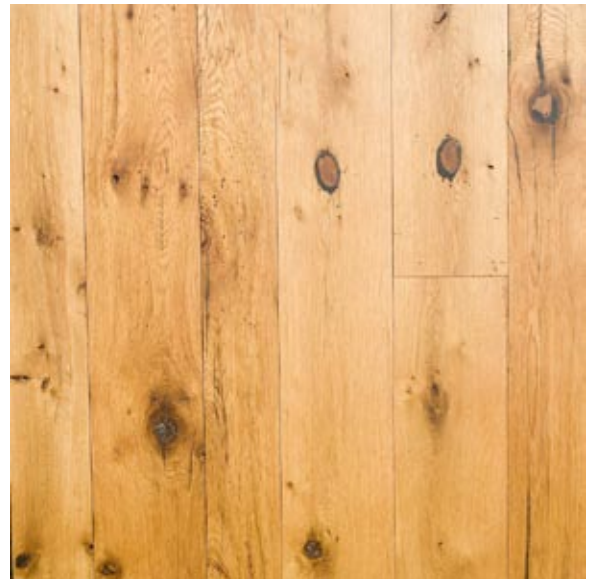

5

The rich patina you will see as a result of the boards being exposed to the elements makes this wood not only have an incredible story to tell but shows such rich colouring from age that it's absolutely stunning. The wood is retrieved from old barns, beams, and buildings that you will save from the landfill or fire pit. Inspire yourself, family and friends with hand hewn century old barn wood. Turn lost treasures into fine, rich hardwood flooring, trim and solid wood doors for a true conversation piece. Choose an environmental green build solution with the best solid or reclaimed/engineered hardwood flooring available. In fact our Engineered Flooring won the Gold Award in Toronto at the IDEX Show. It can be installed over radiant heat or concrete floors. The planks come in wide widths and long lengths making this an exceptional flooring choice. Each floor is truly "one of a kind".

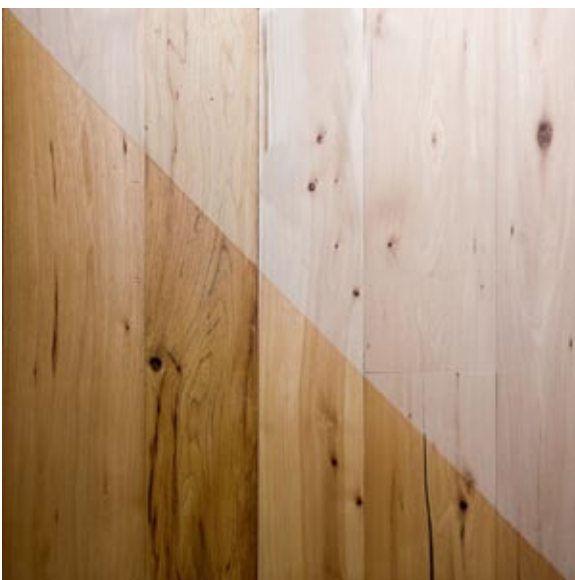

Antique barnboard Hemlock

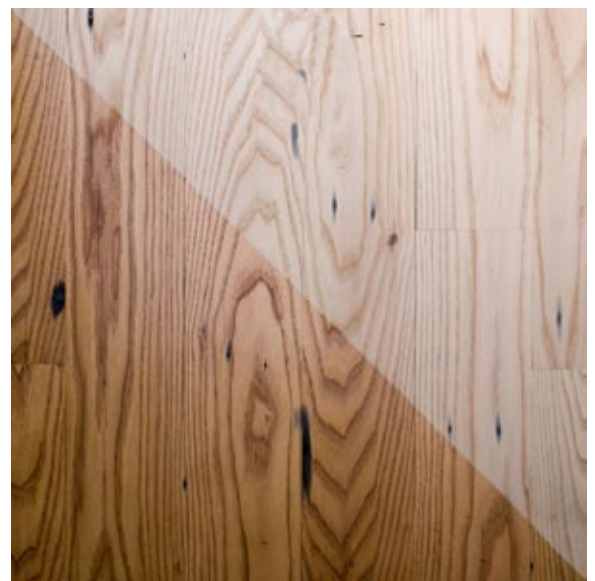

Antique Oak

Antique Elm

Antique Resawn Chestnut

**Solid or Engineered**, both are 3/4" thick  
 It certainly appears that the engineered floor can be sanded as many times if not more.  
 Engineered costs more, but it is more stable and can be used on concrete and over infloor heat situations. 1-877-575-4411

Antique Chestnut Barnboard

Antique Ash

Antique Beech

Salvaged Queens Wharf Pine

# *Salvaged Wood Flooring*

The once lost treasures that our divers recover from freshwater lakes have been submerged for over a century and can be up to 500 years old. This allows us to offer you a product that is not only unique, but rich in history. We are proud to offer a wide range of products, hand crafted from the finest water recovered old-growth hardwood in the world. Our unique antique products feature spectacular colour and vibrant three-dimensional texture not found in contemporary wood. Each log that we recover is carefully hand milled and air-dried before being kiln dried to 6-8% moisture content. For the discriminating homeowner, we can also supply matching Trim and Solid Wood Doors to compliment your Flooring choice. You will be purchasing an exceptional quality wood product without sacrificing the standing forests of today.
